

Wizard PK Ring Sizer

Instructions

Print out this page, making sure that any 'page scaling' is set to 100% in your print dialogue (there is sometimes a 'scale to fit page' setting, make sure this isn't ticked!) Once printed, cut carefully around the dotted line.

Place the end 'Start' on the top (knuckle side) of your finger and wrap the sizer around the finger you are measuring at the point you want the ring to fit.

Ensure this printed side is outermost.

Where the edge marked 'start' touches a notch, the corresponding size is your ring size. We recommend going for the closest low number... i.e. if you are between 21 and 23, go for a size 21.
